

**UNIFORM CRIME REPORTS**  
**January-June 2004**

**For Release  
December 13, 2004**

Collectively, law enforce

attention in the first 6 months of 2004 when compared to figures reported for the first half of 2003. The violent crime category includes murder, forcible rape, robbery, and aggravated assault. The number of property crimes nationwide from January to June of 2004 decreased 1.9 percent when compared to data from the same time period in 2003. Property crimes include burglary, larceny-theft, and motor vehicle theft. Because the level of participation differs among agencies reporting the property crimes of burglary, larceny-theft, and motor vehicle thefts and those also reporting arson, data for arson (also a property crime) are not included in the property crime totals. Figures for the first half of 2004 indicated that arson decreased 6.8 percent when compared to 2003 figures.

The data presented in Tables 1 and 2 indicate the percent change in offenses known to law enforcement for the first six months of 2003 and 2004 by population group and geographic region, respectively. Table 3 reflects the percent change within the Nation for consecutive years (each year compared to the prior year). Table 4 presents a two-year comparison for the first halves of 2003 and 2004 of offenses known to law enforcement for agencies having a resident population of 100,000 and over. All data in this report are preliminary.

**TABLE 1**

Percent Change  
by Population Group

Population Group	Number of agencies	Population	Violent crime	Murder	Forcible rape	Robbery	Aggravated assault	Property crime	Burglary	Larceny-theft	Motor vehicle theft	Arson
<b>Total</b>	10,782	222,904,429	-2.0	-5.7	+1.4	-5.0	-0.9	-1.9	-2.2	-1.9	-1.6	-6.8

**December 13, 2004**

**PLEASE NOTE**

Figures used in this report are submitted voluntarily by law enforcement agencies throughout the country. Individuals using these tabulations are cautioned against drawing conclusions by making direct comparisons between cities because many factors affect the amount and type of crime from place to place. Some of these factors are listed in the annual publication *Crime in the United States*. More valid use can be made of these figures by determining deviations from national averages and through comparisons with averages for cities in similar population groups (Table 1). It is important to remember that crime is a social problem and, therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control. Data users can obtain assistance by calling (304) 625-4995.

Data users are cautioned against comparisons of crime trends presented in this report and those estimated by the National Crime Victimization Survey (NCVS), administered by the Bureau of Justice Statistics. Because of differences in methodology and crime coverage, the two programs examine the Nation's crime problem from somewhat different perspectives, and their results are not strictly comparable. The definitional and procedural differences can account for many of the apparent discrepancies in results. The Department of Justice's fact sheet, "The Nation's Two Crime Measures," contains a detailed description of the NCVS and Uniform Crime Reports.
